- ZOUAVE (Stout) Evergreen. 9 C. Petals rich fulvous red with darker mid-zone; sepals lighter. 4" blooms. 2 ft. March-September. .50

CRINUM

These magnificent flowering bulbs are closely related to amaryllis and pancratium. Evergreen, of easy culture in Florida and the Gulf States, and splendid greenhouse and conservatory plants farther north.

- AMABILE. Immense, dark green leaves, 4 to 5 feet tall. Flower stem purplish red, 4 or more feet high, bearing thirty to forty glossy pink very fragrant flowers. Small bulbs \$1.00 to \$1.50
Large \$4.00
- ASIATICUM. Another of the larger sorts, forming a magnificent rosette of dark green leaves and bearing almost constantly large clusters of fragrant white flowers. Small bulbs \$1.00 to \$1.50
Large \$4.00
- CAMPANULATUM. A strong growing plant with wavy-margined, strap-shaped leaves and scapes on which are borne from ten to twelve lovely bell-shaped flowers, white striped, dark pink, 3" across, and petals strongly recurved. Small bulbs .75; large bulbs \$1.00
- J. C. HARVEY. A fine, vigorous hybrid (C. Moorei x Kirki). Evergreen. Partaking in habit almost equally of both parents. Flowers rose-pink, exceedingly fragrant and of good substance. A single bulb often producing three flower stalks in one season. Small bulbs .75; large bulbs \$1.00
- KIRKII. The flowers are large, white, with a reddish purple stripe on the back of each petal which showing through, gives the flower a pink tinge on the inside; some four to six of these flowers are produced at the top of a tall purple spike, and there are frequently two or more spikes of bloom from the bulb during the season. Small bulbs .50; large bulbs .75
- LONGIFOLIUM. Strong grower, producing large umbels of fragrant white flowers tinged with pink. Small bulbs .50; large bulbs \$1.00
- MRS. ELLEN BOSENQUET. This crinum originated by Mr. Alfred Bosenquet, of Fruitland Park, is by far the loveliest of the lot, and on an entirely new departure in the color line. The blooms are large, cup shaped and of a deep glowing rose, fading very little as the flower ages. Prolific. Small bulbs .50 and \$1.00; large bulbs \$1.75

SANDERIANUM. A strong grower, not particular as to soil. Flowers are in small umbels, large and showy, striped white and carmine, three to four inches in diameter. Small bulbs .25; large .35

SCABRUM. Flowers dull white, tinged rosy red. Leaves light green, spreading, with wavy edges. Small bulbs .50; large .75

VIRGINICUM. A choice hybrid originated in England. Flowers very large and open wide. White and rosy pink. Very fragrant. Small bulbs .35; large .50

DIETES (Moraea) African Iris

Moraeas having rhizomatous rootstock and evergreen foliage are called Dietes. They are native to South Africa and belong to the Iris family. They are hardy in Florida and along the Gulf coast. Their cultural requirements are not difficult to meet. They will grow under any conditions, but will bloom best in full sun. They bloom continually from the same stem. Each flower lasting but a day. Fine for patio use and planter boxes.

BICOLOR. A very distinct species with narrow green foliage and light yellow flowers marked in the center of the falls with dark velvety brown purple. Blooms all summer. \$1.00

CONTRAST. Contrast is descriptive of the coloring of its well rounded flowers, with standards and falls of pure cream heavily and boldly marked deep brownish orange in the center of the falls and the style branches, making a triangle of dark purple in the center of the flower. .75

IRIDIODES JOHNSONI. A robust grower. Flowers are very large, pure waxy white with orange and brown signal blotch and large lavender style branches. Blooms often. .50

LEMON DROPS. The flower is large and well proportioned, creamy white in color of the petals with large marking of lemon yellow on the center of the falls. \$1.00

ORANGE DROPS. The flower is large and well proportioned, creamy white in color of the petals with large marking of orange on the falls. .75

AGAPANTHUS (Blue Lily of the Nile)

Agapanthus bloom in early summer and are of easy cultural requirements. In fact, the most frequent cause of failure to flower is too much care and fussing with them. Plant in a shade or semi-shade and leave them alone, other than occasional watering in dry weather. Mix peat or leaf mold and well rotted cow manure with our sand, and light mulching of leaves or grass clippings. They make wonderful pot plants.

ORIENTALS. Robust growing specie. Has large heads of blue flowers on four foot stems. Blooming size \$1.00; smaller .50

Stokesia blue .25

PLEASE READ BEFORE ORDERING

TERMS—Cash with order. No reservations unless accompanied by full amount of purchase price.

DISCOUNTS—Orders of \$10.00 or more 10% discount allowed.

GUARANTEE—We guarantee healthy stock, freshly dug, true to name, properly labeled and packed to reach you in good condition. If plants reach you otherwise please return promptly and fresh plants will be sent or money refunded.

PRICES—Prices are based on strong, one to two division plants.

MAIL ORDERS—Postage is paid on all orders of \$5.00 or over, except for Crinums. On smaller orders please add .50 cents for packing and postage. Orders for Crinums please add 25% of bill for postage. Crinums are big heavy bulbs. Foreign orders please enclose enough for all carrying charges.
